

Vaccinations for Boarding

THE FOLLOWING VACCINES NEED TO BE CURRENT

DOGS

DAPP

RABIES

BORDETELLA (sometimes called Kennel Cough)

Dogs need to be on a regular flea and tick treatment as well as monthly heart worm prevention. Regular deworming as recommended by your vet is also advised.

CATS

Core vaccines are required for cats. This includes FPL, FVR, FCV AND Rabies.

Both dogs and cats need to bring enough food for their stay so that they stay on their regular diet while in our care.

We provide a litter box and litter for your cat, as well as beds and toys. However you are welcome to bring items from home that you wish.

Dogs may have toys, chews and treats that they are accustomed to at home. We do offer blankets and raised beds as needed, but you may bring items from home if you wish.

We offer soft music to keep your pet calm while boarding in our climate controlled areas. Your pet is monitored by security cameras in each room to insure their safety and comfort.

Dogs are given exercise time in our play yards several times a day and we have outside shaded kennels for lounging in appropriate weather.

Cats have large kennels with climbing features so they have room to move around and explore. We also have a TV nearby for those who like to watch nature channels.

Pearly Gaits Ranch Pet Boarding is licensed by the State of Kansas and has regular inspections to insure we are compliant in all areas. The owner/operator is also a licensed veterinary technician and is qualified to give medications and insulin injections if needed. We have a refrigerator on the premises for storage of medications and opened soft food.

We do have an emergency plan in place as required by the state. In the case of local emergencies your pets will be maintained in a safe environment until you are able to be reunited with them.
